# Biomimetic, Minimally Invasive Esthetic Dentistry

## AIMS OF THE COURSE

Keep up with the ever-changing cutting-edge esthetic dentistry.

World renowned speakers, Dr Nikhil Bahuguna will take you through a series of lectures to discuss the latest trends in Esthetic, Digital and Biomi-metic Dentistry. Following biomimetic principles, minimal and non-preparation esthetic procedures will be shown through easy-to-use clinical procedures from smile design to cementation procedures.

The uniqueness of the edelweiss DIRECT VENEER and OCCLUSIONVD systems will be highlighted through practical clinical cases. Full mouth rehabilitation cases will be discussed, step-by-step from opening of the vertical dimension, splint therapy to cementation of final restorations.

In the indirect technique, digital workflows using the state-of-the-art edelweiss hybrid glass CAD/CAM material will be demonstrated from designing, tooth preparation, milling procedures and finishing of the final CAD/CAM restoration.

Form and Function (Smile Design to Occlusion Design) for the dentist who wants to advance their skills to help patients from simple cases like midline diastema to advanced clinical cases like severe tooth wear and more complex dental problems will be demonstrated.

Dear Doctor, we welcome you to the edelweiss dentistry family!
