# Bio-Esthetics and Function in Harmony

---

## ABSTRACT

Conservative treatments that modify the shape, size, and color of the teeth to meet patient's expectations, is leading the way in esthetic trends. edelweiss dentistry is at the forefront of this minimally invasive esthetic trend. The edelweiss Direct VENEER and OCCLUSIONVD systems fullfills patient's bio-logical, bio-mechanical and bio-esthetic needs and does not require additional steps like anesthesia, impressions, temporary restorations, etc. – resulting in cost and time saving for the dentists and patients.

Develop the knowledge and skill to understand and identify patient's unmet needs to boost elective treatments within your office. Optimize your practice business by applying mostly conservative techniques and maintaining strict ethical behaviour. Explore advanced knowledge in the field of Aesthetic treatments, including aesthetic diagnostics; treatment planning based on bio-mechanical principles; bleaching; direct composite techniques with specially pre-fabricated veneers & occlusions!

edelweiss Direct VENEERS and OCCLUSIONVDs represent the anatomic foundations for single or complete reconstructions and for increasing the vertical dimension in the posterior region. Hence, functioning anterior cuspid guidance can also be obtained using edelweiss "VENEERS".

This versatile field of application, as well as the time and cost saving method, makes it a wonderful addendum to the clinical practice repertoire with full benefit to the patient in every sense!

Clinical workflows for perfect smiles using innovative minimal or non-invasive procedures, bringing harmony and balance to the face naturally.

Discover your smile!

## LECTURERS

**Stephan Lampl**  
B.D.S. M.D.T. B.B.A.  
CEO & founder edelweiss dentistry

**Desigar Moodley**  
PhD, Msc Dent, PDD Aesthetic, B.D.S.  
Chief Scientific Officer
